TARIFF FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially, however, new pages are occasionally added to the tariff. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the SCPSC. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc., the most current page number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
- D. Check Sheets** - When a tariff filing is made with the SCPSC, an updated Check Sheet accompanies the tariff filing. The Check Sheet lists the pages contained in the tariff, with a cross reference to the current revision number. When new pages are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remain the same, just revised revision levels on some pages.) The tariff user should refer to the latest Check Sheet to find out if a particular page is the most current on file with the SCPSC.

SECTION 5 - NETWORK SERVICES DESCRIPTIONS, (CONT'D.)**5.4 ISDN Service**

Integrated Services Digital Network (ISDN) is a set of transmission protocols that provides end-to-end digital connectivity and integration of voice, data and video, on a single Customer loop to support a wide variety of services via the public switched network. The Primary Rate Interface (PRI) consists of a twenty-three (23) B+D configuration with twenty-three (23) 64Kbps Bearer (B) digital channels and one (1) 64Kbps Data (D) digital channel. The B channels are designed for voice, data, image and sound transmissions. B channels can support synchronous, asynchronous or isochronous services at rates up to 64Kbps. B channels can be aggregated for higher bandwidth applications. The D channel PRI provides the out of band signaling, call control and messaging.

5.4.1 Primary Rate Interface (PRI Service)

ISDN-PRI is provided through standard four wire DS-1 (1.544Mbps) point to point, private line facilities that enables Customer control of the 24 individual channels. PRI supports 1+, 0+, 7 digit, and 10 digit Local, IntraLATA and InterLATA services, as well as 01+ and 011+ international calling. PRI allows Customers to direct voice, data and video over the switched network. PRI also allows access to switched network, such as Two-Way, Incoming Only, Outgoing Only and DID.

Multiple PRI interfaces can be combined to function as one group. Utilizing a Backup D Channel arrangement, Customers are able to link up to 20 DS-1s together, providing a maximum of 479 64Kbps B channels controlled by a single D (signaling) channel. The Customer's terminal equipment and interconnection through non-digital central offices may cause transmission speeds to be slower than the maximum achievable.

Customer Premise Equipment that is compatible with the ISDN interface is the responsibility of the customer. The Company is not responsible if any changes in the provisioning of PRI Service result in the obsolescence of the customer's equipment or the need for the customer to modify or change their customer premise equipment. PRI Service is available where facilities permit.

BRI is provided through Basic Rate Access. The "B" channels offer up to 64 Kbps intra-office transmission of voice or data. This option permits the Customer to utilize either circuit voice or data transmission paths on a per call selection basis. Transmission on the B channel will be circuit switched at 64 Kbps within the switch and/or equipped facilities between ISDN-compatible central offices. ISDN interconnection to non-ISDN equipped central offices will be potentially subjected to analog transmission or sub-rate to 56 Kbps. This option includes one directory number. BRI Service is available where facilities permit.

The following parameters may be provided with Packet Switched B channel and D channel services:

Each B channel packet terminal will be provided logical channels up to the technical capability of the service central office. Each logical channel can carry an independent call with throughput of up to 64 Kbps.

The following rules apply to standard listings in light face type in the white pages (alphabetical section) of the telephone directory and to the Directory Assistance records of the Company.

Only information necessary to identify the Customer is included in these listings. The Company uses abbreviations in listings. A name made up by adding a term such as Company, Shop, Agency, Works, etc. to the name of a commodity or service will not be accepted as a listing unless the subscriber is legally doing business under that name.

A name may be repeated in the white pages only when a different address or telephone number is used.

SECTION 7 - DIRECTORY ASSISTANCE AND LISTING SERVICES, (CONT'D.)**7.1 Directory Listings, (Cont'd.)****7.1.2 Composition of Listings, (cont'd.)****B. Designation**

The purpose of a business designation is to identify the listed party and not to advertise the business. No designation of the nature of the business is included if this is sufficiently indicated by the name. Where a listed party is engaged in more than one general line of business, one additional business designation may be included in the listing when necessary to identify the listed party. When a listed party has two or more listed telephone numbers or two or more business addresses, designations indicating the branches of the organization may be included where necessary to assist the public in calling.

A designation may include a title to indicate a listed party's official position, but not the name of the firm or corporation with which the individual is connected. Individual names or titles are not shown following the name of a firm or corporation. A term such as "renting agent" may be included in a listing indented under the name of a building, provided the agent maintains a renting office in such a building.

C. Address

Each non-profit listing may, but does not have to, include the house number and street name of the establishment where the telephone service is provided. Other information, such as a building name or a locality designation, may be included to help identify the Customer.

D. Telephone Number

Each listing may include only one telephone number, except in an alternate telephone number listing where each number listed is considered a line for rate purposes.

A listing may include only the telephone number of the first line of a PBX system or incoming service group, except that a trunk not included in the incoming service group of a PBX system, or the first trunk of a separate incoming service group of a PBX system may be listed to meet special conditions where a corporation and its subsidiaries use the same PBX system.

SECTION 10 - MISCELLANEOUS SERVICES**10.1 Carrier Presubscription****10.1.1 General**

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

10.1.2 Presubscription Options - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance Presubscription are available:

- Option A:** Customer may select the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.
- Option B:** Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.
- Option C:** Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.
- Option D:** Customer may select a single carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription.
- Option E:** Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls: one carrier to be the Customers' primary intraLATA interexchange carrier, the other carrier to be the Customer's primary interLATA interexchange carrier.
- Option F:** Customer may select no presubscribed carrier for intraLATA or interLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA and interLATA toll calls to the carrier of choice for each call.

10.1.4 Presubscription Procedures

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90 day period will not be assessed a service charge for the initial Customer request.
